

Cybersecurity Trends & Safeguards for Manufacturers

Lunch and Learn, No-Cost to Attend

Tuesday October 23, 2018 - 11:00 am - 1:00 pm

at Monty's Restaurant, Bloomsburg University, Bloomsburg, PA 17815

The Northeastern Pennsylvania Industrial Resource Center (NEPIRC), in conjunction with [DRIVE](#), [SEDA COG](#) and [Site2](#), a managed security services provider, is hosting a no-cost seminar specially designed to help manufacturers respond to current threats and trends in the world of cybersecurity.

Cybersecurity is one of the top challenges facing businesses in 2018 and beyond. As more and more services we use reside in the cloud, companies need to continue to be more vigilant and proactive in protecting their data.

Join us for this informational session to gain a detailed understanding of the current cyber threats facing manufacturers.

Topics covered include:

- Ransomware
- Hacking
- Breaches
- Disasters

Safeguards will be presented including best practices for:

- Prevention
- Mitigation
- Incident response

About the Presenter - Marc Gonzalez, Partner & Information Security Officer at Site2

Marc is a risk management and cyber-hygiene specialist with over 26 years of experience. His career includes work for three Fortune 100 companies in support of the Financial Services and Healthcare industries. Marc's experience includes technology audits, cyber security compliance, application development, and business continuity planning. As a Certified Information Systems Auditor (CISA), Certified Business Continuity Planner (CBCP), and Certified Information Systems Security Professional (CISSP), Marc is well qualified to assess a company's compliance posture and recommend risk mitigation strategies. Marc is a graduate of the University of Scranton with a B.S. in Information Systems and an M.B.A. in Finance.
